Subject: SAE 100R18 CPLT 3000 and CPLT 3600 phase out

Dear Customer,

After many years of service, we inform you that our range of SAE 100R18 CPLT 3000 and CPLT 3600 (all versions, including privately branded ones) will be phased out within the end of 2022. More precisely, this will affect the following hose product families:

125 - R18 CPLT 3000 - CONSTANT PRESSURE LOW TEMP

155 - R18 CPLT 3000 NC - CONSTANT PRESSURE NON CONDUCTIVE

153 - CPLT 3600 - CONSTANT PRESSURE LOW TEMP

156 - CPLT 3600 NC - CONSTANT PRESSURE LOW TEMP NON CONDUCTIVE

However, the phase out of one range, leaves room for a newer range to be launched.

With a constant working pressure of 210 bar (3,000 psi), 250 bar (3,600 psi) and a 4:1 safety factor, and an enhanced flexibility, the new CP NEO series is the new range that we are launching.

Conceived for hydraulic applications, the CP NEO is the ideal hose for forklift masts. It will be available in a variety of version, as twin or multiline, non-conductive, and also for low temperature. Please refer to our website for the latest information and literature:

[CP NEO - Link to the dedicated page on our website](#)

We invite you to take note of this announcement and schedule your orders for the old SAE 100R18 CPLT 3000 and CPLT 3600 accordingly, and concurrently, introduce the new range to ease the changeover.
